The graphs and pie chart contained in the 1978-79 Annual reflect caseload trend and expenditures data only for the AFDC (FG and U), BHI, and GR Programs; the data in the Appendix portion of the Annual provide historical information on the average monthly number of recipients and expenditures by type of care, source of funds, and the average monthly grant for these programs, as well as for the Aid to Potentially Self Supporting Blind Program which is still administered by the Department of Social Services.

Caseload and expenditures data for the Adult Aid Programs (Aged, Blind and Disabled) are not included in this Annual because of the assumption of the administration of the programs (now the Supplemental Security Income/State Supplemental Program (SSI/SSP)) by the Social Security Administration effective January 1, 1974.

Child Protective Services referral and caseload movement data are included in this publication (see Tables 26 and 27). Also included are the state and county administrative expenditures data for Adoptions, Licensing activities, Child Protective Services and Life Care Contracts.

Following are two tables providing data for a comparison of the average monthly number of recipients and total expenditures for the AFDC and GR Programs for Fiscal Years 1977-78 and 1978-79.

[a] A medical care program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical Care expenditures for October - December 1957 included in Aid to the Blind. Medical Care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care program after October 1957 are included in "Subsistence", data on expenditures for these medical services are not available. Public Assistance Medical Care program terminated February 28, 1966. Payments made under the California Medical Assistance Program beginning March 1, 1966, are not included in the above.

[b] Sum of average subsistence cost for twelve months and average medical care cost for eight months.

The graphs and pie chart contained in the 1979-80 Annual reflect caseload trend and expenditures data only for the AFDC (FG and U), BHI, and GR Programs; the data in the Appendix portion of the Annual provide historial information on the average monthly number of recipients and expenditures by type of care, source of funds, and the average monthly grant for these programs, as well as for the Aid to Potentially Self-Supporting Blind Program which is still administered by the Department of Social Services.

Caseload and expenditures data for the Adult Aid Programs (Aged, Blind and Disabled) are not included in this Annual because of the assumption of the administration of the programs (now the Supplemental Security Income/State Supplemental Program (SSI/SSP)) by the Social Security Administration effective January 1, 1974.

Child Protective Services referral and caseload movement data are included in this publication (see Tables 26 and 27). Also included are the state and county administrative expenditures data for Adoptions, Licensing activities, Child Protective Services and Life Care Contracts.

Following are two tables providing data for a comparison of the average monthly number of recipients and total expenditures for the AFDC and GR Programs for Fiscal Years 1978-79 and 1979-80:

[a] Includes AFDC - Unemployed beginning February 1, 1964

[b] A medical care program for recipients of public assistance was put into effect in California in October 1957 and all expenditures for services received under this program are reported as "Medical Care." Medical care allowed as special needs in recipients' grants prior to October 1957 and grant allowances for services not covered by the Medical Care program after October 1957 are included in "Subsistence"; data on expenditures for these medical services are not available. Public Assistance Medical Care program terminated February 28, 1966. Payments made under California Medical Assistance Program beginning March 1, 1966, are not included in the above.

[c] Includes supplemental aid from county funds.

[d] Based on recipients eligible for Public Assistance Medical Care.

[e] Sum of average subsistence cost for twelve months and average medical care cost for eight months.

[f] Includes state bad-out $266,784,662.

(Total assistance payments through 1957 represent subsistence payments only.)

(Total assistance payments since 1967 represent subsistence payments only.)
